

KNIFE THROWING

The aim of this event is to throw your knives at the target without hitting your assistant. The closer you get to the assistant the higher your score. But watch those knives otherwise she could come to a sticky end !

TRICK SHOOTING

You'll have to be quick on the draw to become the fastest gun around. Shoot the targets as they pop up but don't shoot young ladies or innocent people in the back or the Sheriff or you'll lose points and a lot more besides if they send out a posse!

BOTTLE SHOOTING

Shoot the bottles when thrown in the air.

BRONCO RIDING

Pit your stamina and balance against a mean, bucking bronco and hold on until the dust settles. To remain seated on the horse push the joystick in the same direction as the highlighted arrows on the direction icon. Don't allow the arrow to reach the end otherwise you'll be in for a fall. Watch your score increase the longer you stay on.

CASSETTE: Press SHIFT and RUN/STOP together. **DISK:** Place disk into Drive and type LOAD"***,8,1 the game will now load automatically

CONTROLS: Joystick

STAGE COACH RESCUE

The scene is set, the Indian has ambushed the last Stage and the occupants are in dead trouble. The Joystick controls the action, wiggle the joystick left and right. To make the horse run towards the stage move the joystick up and down to avoid the luggage. Once you are alongside the coach press the fire button to climb aboard. Fight the Indian by pushing up to punch towards the head and down to punch towards the stomach. Pushing left and right blocks the Indian's punches. Your mission is timed, therefore speed is of the essence.

CALF ROPING

The crowd is cheering, the sun is shining, the atmosphere is electric. The gate is opened and the calf is away. Follow the calf using your skill and judgment, slip the lasso over the calf's head and bring it to a halt in the quickest time. Use the joystick to move you forwards, backwards, up and down. When you are close enough to the calf press fire to throw the lasso and pull back on the joystick to halt it.

STEER WRESTLING

The idea is to chase the steer and when you are close enough jump on it and take hold of its horns. Use all your strength and leverage to overbalance it and get it on the floor. Use the joystick to control your horse's movement. As in calf roping get as close as you can and then leap and grab hold of its horns by pressing the fire button. Overbalance the steer by wagging the joystick left and right until it falls to the ground. Again this event is timed.
